this game is so good i found my girlfriend while playing 10 out of 10. Heroes

-Scholar, possibly the one classic tank character, where he reduces damage dealt to him but heals it back quickly. He is capable of dealing a lot of damage in single shots though, with prep, especially his one variant.

Villain

-Miss Information is a special character in that she can't be fought until some conditions are met. I have found this to be frustrating but she is still a fun fight.

Environment

-The final wasteland is a simple environment that is fairly easy to work around. ranges from neutral to favoring the heroes.. Great mod for a great game set in the great war, only wish there was more factions.. I see the potential in this game it seems very fun with friends to mess around with however my friends don't want to play this game with me :c so im stuck with it alone f e l s b a d m a n. It's pretty fun, especially for the price.

It's a very decent game. Not really into point and click games, but I enjoyed this. :D. i feel like i got masturbated to by a dinosaur. After playing Final Assault (with direct unit control), I was worried this game wouldn't be as fun. I was wrong. The balance of spells, fortification placement and unit variety make this game a LOT of fun. Short rounds prevent prolonged stalemate situations and allow you to come back for the next round with new fortification and unit placement strategies. Lots of fun with an easy learning curve for beginners and tactical elements to make it very competitive for advanced players. Highly recommended.. I so want to give this game a good review. I have always loved period-piece strategy games. I went through all the stuff getting it to run on my Win 10. No big deal there. A lot of games haven't been re-worked to run on it. What got me was Nobles continuously vacating their Villas because of "lack of entertainment". I had built 2 Odeums and a theater directly across the road from their neighborhood. The entertainment overlay even showed that those villas were covered. Until or IF that gets changed, my review sadly has to stay negative. Losing Nobles loses income I can't afford to lose. It is very expensive to keep both my citizens AND Rome happy :p. The game was quite good, but 1 was a lot better in many respects.. another evonylike game not worth the time to download.. Does not work with Magix Music Maker 2017 Premium DAW. Really wish it did. Infact it completely cripples Magix to the point of having to reinstall after trying to use it.

It's a killer tool that makes creating beats super easy. From using it for only a few hours, It's helped me to understand percussive layering ALOT. I can export the beats I make in L.R. as an audio file then import them back into the Magix DAW. The Liquid Rhythm app itself has been proven to be buggy.

Go to the liquid rhythm website and check if your DAW is supported, they do natively work with and support a bunch of DAW's.. Amazing game! Simple yet in depth, this game does have the classic tactical RPG feel with a few great twists. Story is humorous yet adventurous, and i love the vibe of the main character! Worth the \$10 consdiering the replay value of the game, I played through a 2nd time on hard with a completely diff unit setup/vstat build so it didnt feel like trudging through the exact same game twice.

Would love to see more content for this game (maybe an insane hard mode too?) and possibly multiplayer, this game has a lot of potential!!. Tested around 10 minutes.

First feeling : nice graphics. Really love crash animations like IRL.

Setup can't be easier with Taranis, tuning is limited but don't like to bother on this usually so it's pretty ok for me.

Physics is convicing but still need to be improved. Throttle isn't powerful enough (likely 3S or less). Most of my crashes come from that point.

One map only, fun to play with but a bit small, you get LOS quite quickly.

Respawn function works great, You restart instantly. No god mode but very friendly at low speed.

Would love for next update :

- one or two more maps
- 4S Lipo flystyle
- Recording function (and share a flight on FB for instance)
- several frames and spare parts

Well done on this one !

Time to go back in the game and cut some trees ;)
